Consulting Civil Engineers

RJB PROJECTS

COMPANY PROFILE

WHO IS RJB PROJECTS?

RJB Projects is a **consulting civil and structural engineering** company based in Kloof, KwaZulu Natal providing South Africa and the African continent with **innovative engineering solutions**. With over **24 years of experience** within the construction industry, RJB Projects brings this **knowledge and professionalism** to each and every project. They do the hard work so that you don't have to, giving you the **peace of mind** that your project will be a success.

RJB Projects was founded in 2002 by John Butler. John is an **enthusiastic and friendly** person who loves nature and the outdoors. He is a natural problem solver.

A passion for engineering was ignited when he visited the Tugela Pumped Storage Scheme while in high school and saw the impressive underground power station deep inside the Drakensberg mountains. He went on to obtain his engineering degree from the University of KwaZulu Natal and a business degree from UNISA. He **worked in the United States** for two years before settling down in Kloof with his wife and three sons.

John has an **open leadership style** and a desire to learn and improve things every day. He loves to work with clients and meet new people. He considers a project a success if his client is happy, the design is simple yet effective and his staff have enjoyed the work. John leads his team with an **infectious "can-do" attitude** and embodies everything that RJB Projects stands for.

COMPANY VALUES

- Integrity
- Quality
- Collaboration
- Respect
- Professionalism
- Innovation

WHAT CAN YOU EXPECT FROM RJB PROJECTS?

- Friendly, respectable service
- Tailored, non-corporate approach
- A memorable building experience
- High quality, error-free designs
- A constant drive to save you money
- Regular site visits by their engineers

VISION STATEMENT

To be the **most sought-after** consulting engineering company in Africa.

MISSION STATEMENT

RJB Projects has **high ethical standards** and values **trust** and **respect**, which pushes us to consistently produce **high quality, error-free designs**. They strive to provide a **friendly, seamless, and flexible service** to their clients ensuring there is **constant and effective communication** throughout each project. RJB Projects constantly looks to build on their **excellent industry reputation** and bring the mindset of **mutually beneficial co-operation** to all their business relationships.

WHAT THEY DO

RJB Projects caters to the engineering needs of **the public and private sectors** of South Africa and abroad. Their services are available for **each phase of the construction process - from conception to completion**. RJB Projects will be your engineering partner to solve your project's technical challenges.

The professional team ensures that you get **high-quality and innovative designs**. They work hard to give you the peace of mind that **your project will be completed on time, within budget and to your specification**.

RJB PROJECTS AT A GLANCE

950+

SUCCESSFUL
PROJECTS

112+

COMBINED YEARS
OF EXPERIENCE

16

AFRICAN
COUNTRIES

COMMERCIAL AND RESIDENTIAL

Over **200 clients** have trusted **RJB Projects** with the structural design of their homes and office blocks. RJB Projects makes sure that **your interests are looked** after by **focusing on the details** and by being **proactive members of the team**.

South Africa has a housing shortage and RJB Projects is proud to be part of the solution. The team takes great pleasure in knowing that their commercial projects help grow the economy around KwaZulu Natal and have lasting benefits to the community.

WHAT THEY CAN HELP YOU WITH:

- Office blocks
- Shopping centres
- Major alterations
- Housing complexes
- Hospitals and Medical Facilities
- Luxury houses

"Your calm and friendly manner was very much appreciated and created a very pleasant experience for us. You were a truly valued member of our professional team and the physical proof of your expertise is clear to see in our magnificent new home!!"

Ian Lambie, Homeowner

CIVILS

The backbone of any project is its civil engineering. The importance of good civils and a good engineer is often overlooked but is **essential to make a project a success**. RJB Projects assures you **peace of mind** that all your civil engineering requirements will be attended to and **expertly designed in line with your requirements**.

WHAT THEY CAN HELP YOU WITH

- Bulk water pipelines
- Water and sewer reticulation
- Municipal services
- Storm water management
- Roadworks
- Water Demand Management

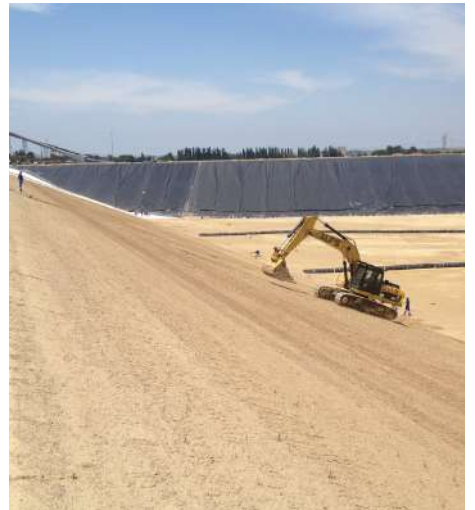

"I can gladly recommend RJB Projects and their team for civil and structural design and project support. Their knowledge base stands out in the marketplace. This coupled with the implementation of realistic problem solving with fit for purpose designs would be a benefit to all clients. They easily adapt to between major and minor project execution and designs. Their personal support for project execution and individualized approach far outperforms the typical corporate approach"

Rinus Vollgraaf, Mechanical Engineering Manager
at PROXA

ENVIRONMENTAL

RJB Projects understands the impact that their line of work has on the environment, and firmly believes that the **environment must be cared for**. They have a proud history of working with environmental companies that do amazing work throughout the African continent. They are also a proud **member of the Green Building Council of South Africa** and strive to be **environmentally conscious** in all their projects.

WHAT THEY CAN HELP YOU WITH:

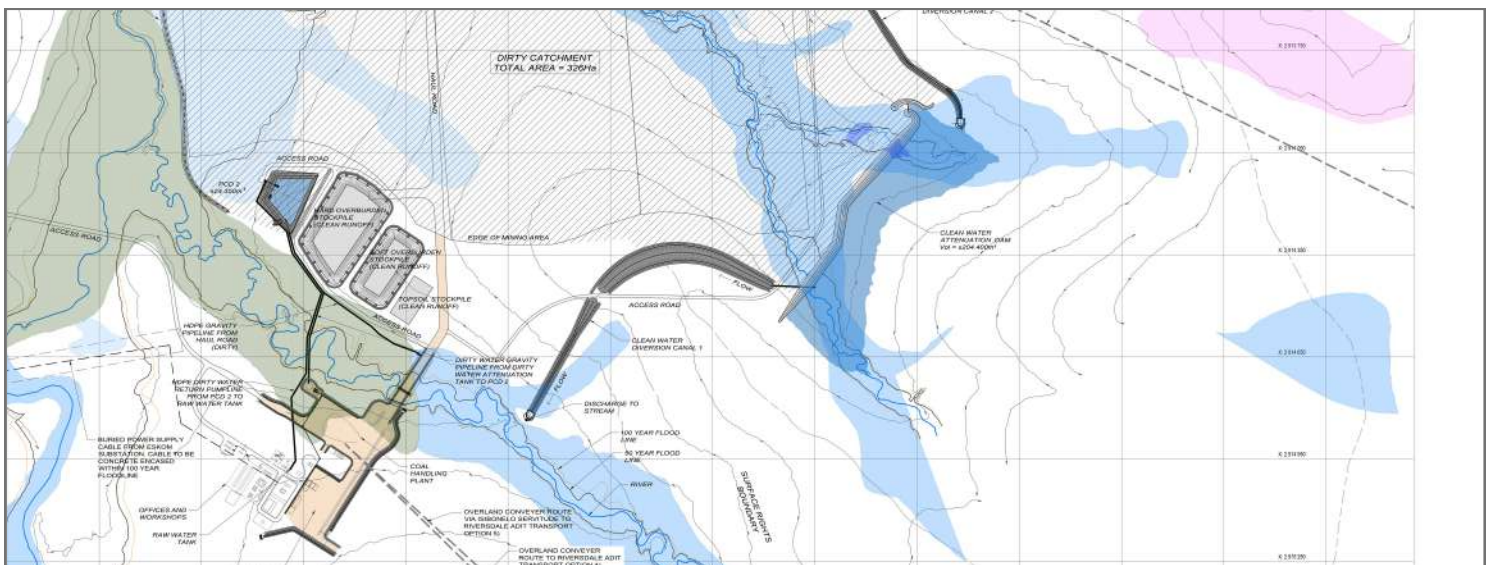

- Storm water management
- Pollution Control Dams
- Rehabilitation of waste dumps
- Artificial wetlands for water treatment
- Waste storage facilities

"Digby Wells Environmental has been working together very successfully with John Butler for a number of years. We have designed and managed the construction of significant brine pond facilities, we have designed and supervised the construction of large wetland treatment systems and we have used RJB for stormwater management and water reticulation system design. We have no reservations about going into projects together with them"

Graham Trusler, CEO of Digby Wells Environmental

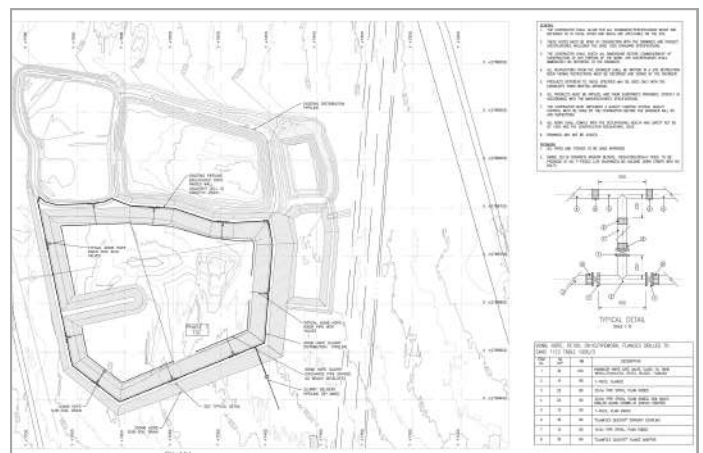

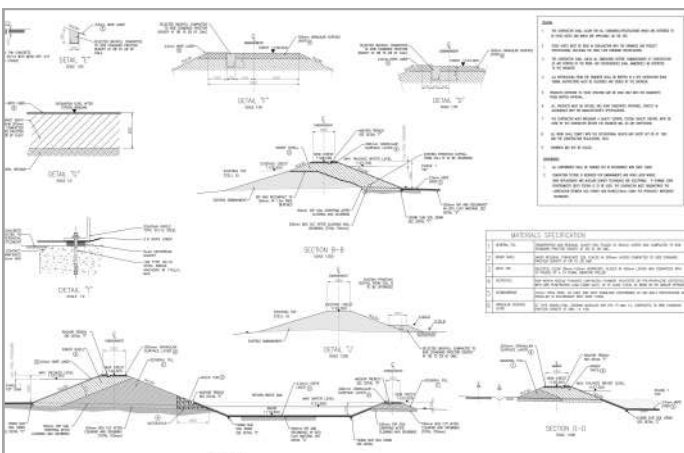

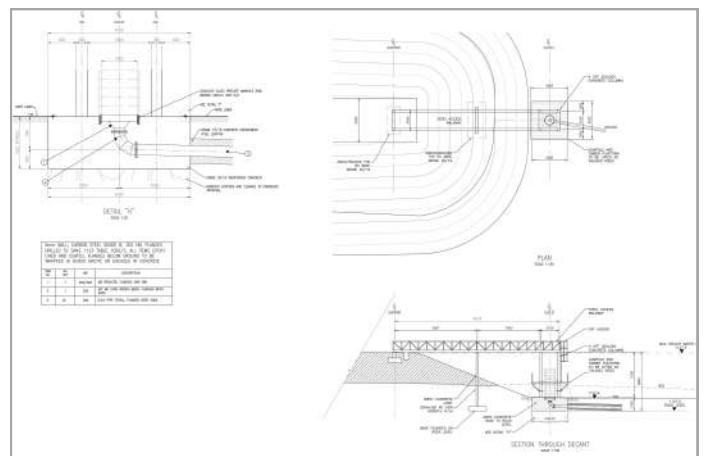

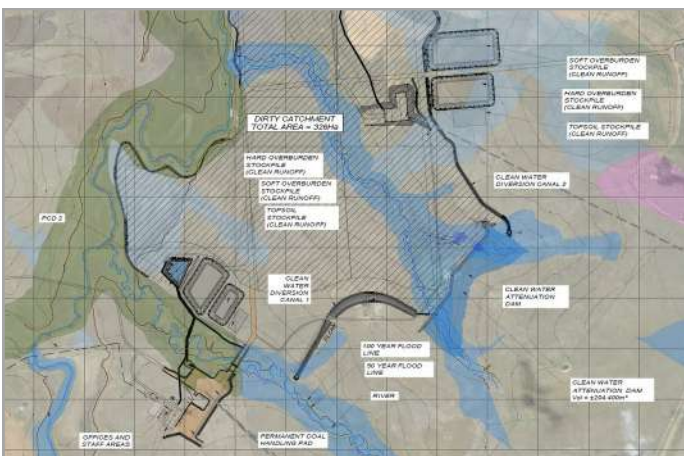

MINE WASTE DISPOSAL

This division of RJB Projects caters to an essential and **highly specialized line of work** within the mining industry. You can be assured that their **engineers are well trained** and come with the necessary experience to develop effective designs to meet the complex and unique needs of each project. You will benefit from their engineer's **broad experience gained from working on projects in South Africa, the United States and South America.**

WHAT THEY CAN HELP YOU WITH:

- Feasibility studies and due diligence reviews
- Detail design of Tailings Storage Facilities (TSF)
- Pollution Control Dams
- Operational audits
- Environmental compliance
- Mine closure plans

"What a privilege and honour to have John Butler of RJB Consulting Engineers on your project team. Very professional, knowledgeable and excellent people skills. I fully recommend John Butler as a trusted Civil Engineering colleague"

Sarel du Toit, Project Manager
EXXARO-MATLA

SPECIAL PROJECTS

RJB Projects newest division has grown out of a need for **flexible and creative engineering solutions** across the African continent. They enjoy the challenge that each project brings and the opportunity to help uplift the continent. As a client you would have access to RJB Project's **multi-disciplinary services** and benefit from their **proven track record**.

WHAT THEY CAN HELP YOU WITH

- Remote working capability
- Operating to world class health and safety standards
- All staff members have high level security and police clearance
- Flexibility

"John Butler and his team are a pleasure to deal with. They understand our priorities and provide timely and technical competence which supports us in achieving our business goals. John leads his team by example and their delivery over the past few years has been sustained at a high level of friendliness, professionalism, and technical accuracy."

Gavin Geraghty, Chairman, ADBLU International.

MORE FROM RJB PROJECTS

"RJB Projects was professional, extremely competent, reliable, and most importantly put the safety of my family first. I would highly recommend him to anyone looking for an engineer and if I ever built another property. I would undoubtedly use John again!"

Myles Wakefield, Homeowner

"Over the years, WSA has enjoyed working on a number of successful projects with RJB Projects. John and his team are professional, responsive, efficient and the work they produce is of a high standard. Their attitude is one of collaboration and are always willing to discuss engineering solutions and accommodate design changes which is essential in our industry."
